REMARKS

By the above amendment, Applicant has amended the title to emphasize the novelty of the invention. Title changes in the specification are made where appropriate.

In addition, applicant has canceled all claims of record and substituted claims 6 and 7 to define the invention more particularly and distinctly over the art cited.

Applicants initial Provisional Patent Application, North American Business Net work 60/273,960, completely disclosing the structure in question objected to by Padilla-Wiederin, claims 1 and 2, was filed 03/06/2001 before Padilla and Wiederin. Further, the Office Action, thankfully, has caused Applicant, in new claims 6 and 7, to define the invention more particularly and distinctly over the art cited.

Very respectfully,

Warren Wojcik
Applicant Pro Se
